

## Onshore Storage Facility Upgrade

1.5km pipeline upgrades to an existing onshore facility to increase the site capabilities and capacity.

Location: **South**

## Onshore Storage Facility Upgrade

1.5km pipeline upgrades to an existing onshore facility to increase the site capabilities and capacity.

### Project Summary

Providing a range of services including thermal insulation, external protection metalwork, trace heating and access solutions to the 1.5 kilometres of new crude pipeline. Our fabrication facility provided design and delivery of critical metalwork to assist the site team in completing their work, while our team of scaffolders helped in making safe working platforms.

### Value Engineering

One of our challenges was to improve application times which we achieved through supply-chain assistance and our in-house fabrication capabilities.
