

Vessel Upgrade

We provided a full complement of services on this project which included access, containment, blasting and coating specifications.

Location: **Scotland**

Vessel Upgrade

We were commissioned by our client, one of the UK's largest agrochemicals manufacturer's, as part of their ongoing storage vessel cyclic maintenance programme to prepare and re-paint several vessels to provide continuous protection against corrosion.

Project Summary

We provided a full complement of services on this project which included access, containment, blasting and coating services

Value Engineering

Collaboration with our suppliers and site engineering resulted in a solution that ensured shorter plant downtime and reduced future disruption.
