

Are you conducting Job Specific Risk Assessments?

Actions to Take to Prevent Dropped Object Incidents

Always think about hazards and follow
5 Simple Steps so **YOU** can complete
your activities safely.

- ✓ 1. Stop, step back, observe.
- ✓ 2. Think through the task.
- ✓ 3. Identify any hazards.
- ✓ 4. Control the hazards.
- ✓ 5. Complete the task safely

How does JSRA work?

It helps to identify and
control any potential
hazards to make sure
they are addressed
prior to commencing
activities.

JSRA ensures final checks are
conducted and complements
the QSHE365 Risk Assessment.

DANGER DROP ZONE - DO NOT ENTER

JSRA should be performed before, during and after tasks are completed

✓ Before Task:

- Stop and think.
- Observe the work area and surroundings.
- Think through the steps of what you will be doing.
- Identify what else is happening in your work area.
- Identify any hazards within your work area.
- Speak to your Line Manager if hazards are not controlled.
- Satisfy YOURSELF the hazards are controlled before starting the job.

✓ During Task:

- Do you feel safe doing the task?
- Are others around you working safely?

✓ After Task:

- Observe the work area.
- Reflect on the task performed.
- Can any improvements be made?

Always monitor
situations and
evaluate tasks
with JSRA

If you see a hazard or spot an unsafe act or unsafe condition, **DO NOT** turn a blind eye.
Deal with the situation and report it to your supervisor using the Enigma Positive Intervention process.
